

Modern market data, analytics and trading terminal for wealth management

Infront provides global multi-asset market data and efficient tools to help wealth managers generate investment ideas, analyse opportunities, execute orders electronically and monitor client portfolios – all while communicating more effectively with their clients.

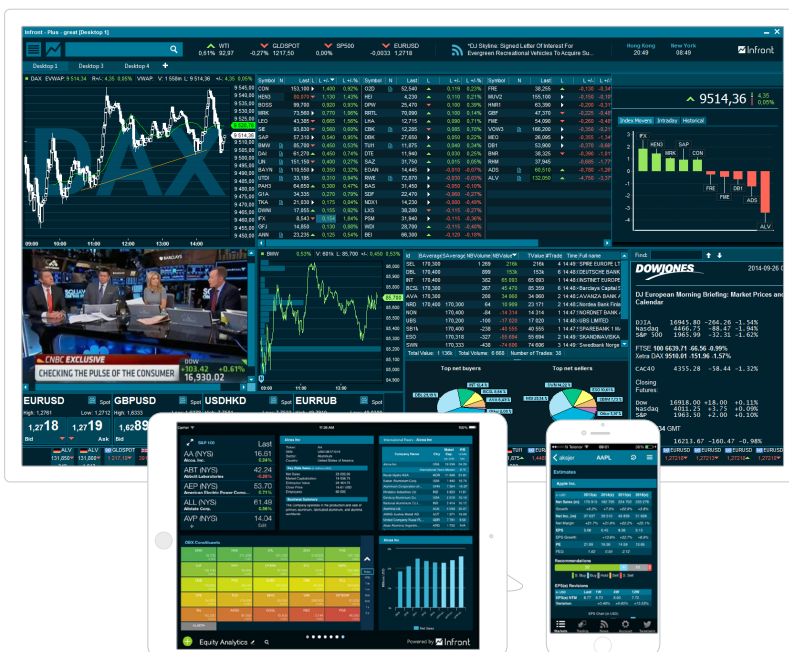

A MULTI ASSET CLASS TERMINAL

The Infront terminal covers every asset class with global real-time, delayed and historical market data from exchanges, MTFs and contributing brokers:

- Equities
- Derivatives
- Fixed income
- Corporate debt
- Commodities
- Funds
- FX
- Money market
- Corporate and macro calendar
- Professional news

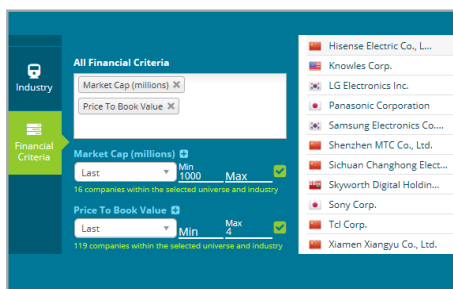

MODERN TECHNOLOGY

- Fast and easy to deploy
- Customisable, intuitive user interface
- Quick to learn, easy to use
- One login from workstation, laptop
- Excel integration
- Mobile apps for iPhone, iPad and Android

Generate ideas faster

Wealth managers rely on Infront to identify investment opportunities quickly. Finding your next investment is easy with global market data, professional news and market screening tools. Search our global database of listed companies with links to news, charts, and analytics.

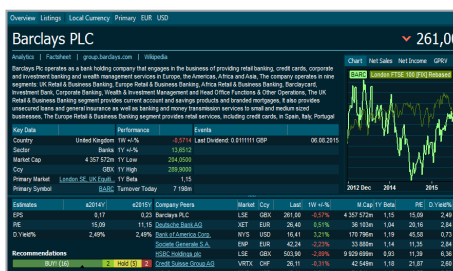

Dig deep with equity analytics

Infront provides high quality data and analytics with extensive global coverage of over 65,000 listed companies. Our recognized expertise in cross-country standardization ensures consistent financial calculations across markets and industries. Challenge different information sources and use the latest technology to get better and faster results.

Communicate more effectively with your clients

Improve your client communication at all stages of the wealth management workflow. Stay one step ahead with powerful search tools and an intuitive UI. Share overview pages for companies, funds, debt and indices, or PDF company factsheets. Follow your clients' portfolios in real-time, across asset classes. All Infront content can be shared over email, web, IM or even social media with a click.

ABOUT INFRONT

Buy and sell-side institutions in more than 25 countries rely on Infront for its modern terminal with real-time market data, news and analytics covering global markets. The Infront terminal and versatile electronic trading solutions connect thousands of professional users to local and international markets – helping them generate investment ideas, reduce market data costs and trade efficiently with hundreds of global counterparties.
