

Activate your private investor clients and increase your order flow .

Equip your private investor clients with powerful online electronic trading services in your existing infrastructure and increase your order flow. Support multi-asset trading, customize access to global market data, and include your proprietary content all in the same platform. Modern, easy-to-deploy desktop, web and mobile apps, back-office integration, order validation and web-based user administration tools give you fully managed, cost-efficient and customer-driven trading solutions.

A solution for every need

No matter what your market data and trading needs are, Infront has you covered. The Infront Private Investor Solutions include the Infront Active Trader for private investor clients, the Infront Web Trader for mid-tier users and the Infront Web Toolkit for custom web sites. Together with the Infront Professional Terminal for institutional clients and internal sales, Infront solutions have been developed to serve all front-end needs of any financial institution.

Infront Web Toolkit

Create your own financial data and trading solution with Infront's web technology.

The Infront Web Toolkit combines market data, analytics, proprietary data, trading and portfolio components that are easily designed to reflect your brand and customize to meet your customers' needs.

Infront Web Trader

The Infront Web Trader is a ready-made front-end that combines global market data

with charting, news, calendars, portfolio overviews and electronic trading in a modern and easy-to-use solution. The service is completely web-based, and works both on Mac and PC, as well as on tablets. You can choose from a selection of pre-defined layouts or easily create your own.

Infront Active Trader

Empower your most active traders with a powerful trading terminal. The Infront

Active Trader is an advanced, ready-made front-end for medium to active users who place high demands on efficient and fast order execution, and advanced trading functionality. It includes several advanced features including advanced order books, click trading, trading blotters and fast access to global data.

Infront Professional Terminal

Provide your institutional clients with a modern and

cost efficient market data and execution management system with support for multi-asset classes. The Infront Professional Terminal can be customized with various

market data, modules and functions, all easily managed per user and in real time via online administration tools. Integrate easily to your OMS system for a complete overview of accounts, positions, risk management and compliance functionality.

About us

Financial professionals across Europe and South Africa rely on Infront for flexible financial market solutions.
